

Techivation Releases T-Warmer

Audio software developer, Techivation, announces the release of their new plug-in, *T-Warmer*. The company's goal in developing T-Warmer was to create an effective tool for filling up sound by adding unique musical harmonic saturations to low and mid frequencies.

Techivation T-Warmer offers four different high-quality harmonic saturations designed for the purpose of making the low and mid frequencies warmer, and thicker. The plug-in allows you to apply any of these harmonic saturation makers, to a certain frequency range of the sound, from 20Hz to 600Hz, or to the user's tailored choice. With its minimal, yet effective Techivation style design and essential options, T-Warmer will add extra weight to your sound.

The Techivation team has focused on creating a fast and simple solution for adding more weight and warmth to sounds, with this new audio plug-in.

Pricing and availability

T-Warmer is now available at techivation.com for an introductory offer of 29.00 USD, owners of other Techivation plug-ins can get a special loyalty offer of 19.00 USD until August 15th. There is not a free trial available for T-Warmer yet.

All Techivation plug-ins can be downloaded in VST, VST3, AU, and AAX formats for any compatible DAW, including Logic, Garageband, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, etc. available for both Windows and macOS. Techivation plug-ins also support the Apple M1 chip natively.

About Techivation

Techivation is a UK-based creator of music technology founded by Amin Asbaghipour. Techivation started by releasing their first plug-in *T-De-Esser* in 2021, with the aim of creating an easy-to-use plug-in that would help to smooth out high frequencies in a musical and natural manner. A year later, Techivation remains fully invested in their vision of creating quality tools to help music producers and engineers to make their music and audio sound better in innovative ways, and to simplify their workflow and allow more focus to be directed towards creativity.
